Julie Evans (021) 992 558

WELCOME!

In the past 26 years we have worked through many farming challenges but never have we experienced anything like 2020!

The drought was tough but then the lockdown has delivered new problems to solve. Luckily, the bulls have not noticed this new lifestyle and we are proud to present 14 magnificent R2 Limousin sires for sale.

After much consideration, we have decided to continue with our sale as planned on June 5th. As it is not clear what the lockdown level will be by that time, we are preparing for some alternatives to ensure the sale can still take place and you can secure a quality Limousin bull. We outline the protocols in the next few pages and encourage you to be flexible in your approach to buying. You never know, this may become the way of the future!

We have videos of all the bulls uploaded on both PGG Wrightsons www.bidr.co.nz site and at www.limousin.co.nz. We also offer the opportunity to view the bulls in advance by appointment. The sale will be conducted on line regardless of the lockdown situation. We will provide

timely information should we be unable to conduct the on farm sale in which case the sale will be 100% on line.

Also due to the COVID-19 lockdown, the scanning details were not available at the time of the catalogue going to print. Scanning, updated weights and other details will be updated on line and will be provided on sale day.

Our selection and management process continues to be rigorously maintained so we can present a range of experienced breeders' bulls that have been run together for 9 months under commercial conditions and tested monthly for growth, conformation, structure and docility. That way you can be confident that genetics are tested, not the farming method.

The 2020 draft has an interesting mix of genetics including new sires and some top producing dams. As a group, they have outstanding docility with unbeaten Limousin growth rates despite the drought conditions. The muscling on these bulls yet again demonstrates the impact of the exclusive F94L double muscling gene.

The Limousin breed offers **the complete package**. The exclusive F94L gene delivers **double muscling and exceptional yield** combined with **easy calving**. New Zealand breeders have successfully developed a **structural type to suit local commercial conditions**. Along with **excellent feed efficiency and hardiness**, these bulls demonstrate the outstanding Limousin **growth and muscling performance**.

Welcome back to our regular return buyers and welcome to new buyers! We trust you will not be disappointed with your decision to add more meat and performance to your herd with a Limousin bull!

NILB Bull Trial Committee

COVID-19 Protocols

We have taken the advice of PGG Wrightson's Cam Heggie regarding the sale. Information about the 2019-20 Bull Trial Sale Bulls is available from:

- Printed catalogue and e mailed catalogue
- LBBNZ Website – www.limousin.co.nz - E catalogue
- PGG Wrightson www.bidr.co.nz including videos

On Farm Sale Protocols

1. Farming is an essential service
2. The on farm sale will conform to Physical Distancing as required.
3. There will not be any food or drinks provided this year.
4. The farm will also conform to M. Bovis protocols.
5. Provision of alternative ways to purchase your bull.

We will also use PGG Wrightson online sale platform

www.bidr.co.nz

1. The sale catalogue will be listed on www.bidr.co.nz with photos, videos and pedigrees.
 - (a) Purchasers should register on www.bidr.co.nz in advance and login to some sales in advance to become familiar with it.
 - (b) Your closest PGG Wrightson agent can guide you through the system, on the day of the sale if necessary.
 - (c) **The www.bidr.co.nz sale is co-ordinated with the on farm sale in real time.**
2. Dorothy Kroef (Bull Farm Manager) is prepared to show potential purchasers the bulls in advance, by strict appointment prior to sale.

Should we go into higher lockdown levels, the sale may have to be completely online via the PGG Wrightson Bidr Platform.

If we do need to go to a completely online sale, you will receive the information mid May.

Frank Rientjes (Convenor) 09 2360200 or 0274365032

Dorothy Kroef (Farm Manager) – 09 2336370 or 027 667 6051

GENERAL SALE INFORMATION

Sale Conditions:

1. The auctioneers are PGG Wrightson Ltd.
2. The sale will be conducted under the usual conditions of the Stock and Station Agents' Association.
3. Each lot becomes the property of the purchaser at the fall of the hammer.
4. Terms will be strictly cash before taking delivery of any animals unless prior arrangements are made with the Auctioneers. Accounts not paid within 14 days of sale shall bear interest at current rate per annum from the date of purchase.
5. Transit and Livestock Insurance can be arranged by the Auctioneers.
6. The sale will be conducted purchase price plus GST.
7. Although every care has been taken to ensure accuracy in the production of this catalogue, The North Island Limousin Breeders Inc, PGG Wrightson Ltd and their employees do not accept any responsibility or liability as to mis-description, errors, omissions, or mis-statements caused either directly or indirectly.
8. A Buyer's Instruction Form is to be completed at the office on sale day by all purchasers.
9. REBATE COMMISSION - PGW will pay a purchasing rebate of 6% of the purchase price excluding GST, plus GST, to livestock companies & recognised independent livestock agents with a PGW account who have introduced buyers to PGW before the sale and/or accompanied buyers to the sale. Arrangements must be made prior to the sale and settlement made on the purchaser's behalf within 14 days.

Transport: Transport cost is the responsibility of the purchaser. All bulls must be off the property within one day of the sale and transport is to be pre-arranged.

Testing: All herds of origin have been tested clear of TB (C10). The bulls are tested clear and vaccinated for BVD, protoporphyria tested Negative or Free by Pedigree.

Warranty of Bulls:

All bulls are sold as fertile and capable of natural service. The purchaser is to have the right to a full refund of the purchase price of the bull (excluding any costs and expenses of the purchaser) within six months of the date of the sale subject to submitting a veterinary report stating that the bull is infertile or incapable of natural service. The veterinarian must also state that, in his opinion, there is no evidence that the bull has suffered any injury or illness since being sold to the purchaser which could have affected his breeding ability. The veterinary report (together with a statutory declaration by the purchaser to the effect that the substance of the report is true and correct) must be forwarded to the vendor within 14 days of the date being six months after the sale date.

NILB Inc is not liable for any issues which may arise with the bulls. The purchaser should deal directly with the vendor

Docility Warranty:

All animals are sold as having acceptable docility as defined as score 1, 2 and less than a score of 3 in the official scoring system of the Australian Limousin Breeders' Society. The purchaser is to have the right to a full refund of the purchase price of the animal (excluding any costs and expenses of the purchaser) within 28 days of the date of sale, or a replacement animal of similar quality and price to be supplied by the vendor subject to submitting a veterinarian's report stating that the animal is of unacceptable docility defined as score 3, 4 or 5 in the official scoring system of the Australian Limousin Breeders' Society.

The veterinarian must state that, in his opinion, the animal has not been mistreated in a way which would have affected its behaviour since being sold to the purchaser. The veterinary report (together with a statutory declaration by the purchaser to the effect that the substance of the report is true and correct) must be forwarded to the vendor within 14 days of the date being 14 days after the sale date.

Pedigree Registered: All animals are registered with the Australian Limousin Breeders' Society and are transferable on request by the purchaser. Transfer forms are available on sale day.

Explanation of Suffixes:

Horn Status: (HP*) Homozygous Polled by DNA test (which has an accuracy of 92%), (HP) Homozygous Polled by progeny test, (2P) Homozygous Polled by pedigree, (P) Polled, (S) Scurred.

Colour: (HB) DNA tested Homozygous Black, (2B) Homozygous Black by pedigree, (B) Black, (R) Red (not apricot).

Protoporphyrin Status: (PN) Proto Normal, (PF) Proto free by pedigree, (PC) the animal is a carrier of the abnormal gene for protoporphyria, (PS) Proto Suspect (parent of diseased animal), (PU) the animal has not been tested for protoporphyria or have parents which have been tested normal or are free by pedigree.

Homozygous: is the term where an animal has two copies of a particular gene (tested or pedigree) for a trait (colour, polled). An example is Homozygous polled where by all progeny will be polled from that particular animal or Homozygous black where all progeny will be black.

F94L: (AA) 2 copies, (AC) 1 copy, (2A) 2 copies by pedigree, (CC) no copies.

Understanding Estimate Breeding Values (EBVs)

An Estimated Breeding Value (EBV) is an estimate of the genetic merit of that animal for each trait measured. EBVs are provided for the following traits:

Gestation Length EBV: ranks sires for the time between conception and the birth of a calf. Shorter gestation is indicated by negative EBVs and longer by positive EBVs.

Birth Weight EBV: indicates the genetic potential for birth weight. Positive EBVs indicate higher birth weights and negative EBVs indicate lower birth weights of progeny.

Calving Ease Direct EBV: indicates the influence of the sire on calving ease. Sires with positive EBVs for calving ease will increase calving ease and sires with negative EBVs will decrease calving ease.

Calving Ease Daughters EBV: ranks sires for the ease with which their daughters will calve.

Milk EBV: an important component of fast growth to weaning is the dam's maternal performance. A bull with a high milk EBV should produce daughters which milk well.

200, 400 & 600 Day Weight EBVs: an estimation of the animal's genetic potential for growth.

Carcase Weight EBV: ranks animals for carcass weight.

Eye Muscle Area (EMA) EBV: ranks animals for eye muscle area measured at the 12th rib on a 300kg carcass.

Rib Fat EBV: ranks animals for rib fat depth at the 12th rib on a 300kg carcass

Rump fat EBV: ranks animals for fat depth at the p8 site on the rump on a 300kg carcass.

Retail Beef Yield Percent (RBY%): ranks animals for the yield of retail beef cuts from a 300kg carcass.

Intra Muscular Fat Percent (IMF%): ranks animals for the percentage of intramuscular fat at the 12th rib of a 300kg carcass.

Scrotal Size EBV: indicates whether the bull will produce sons with above average or below average scrotal sizes.

Docility EBV: is expressed as the increase or decrease in the percentage of progeny that will be scored as docile (score 1 or 2). Positive EBVs indicate a higher proportion of progeny that will be scored as docile and negative EBVs indicate a lower percentage of progeny being scored as docile.

Comparing EBVs: The EBVs for Limousin cattle cannot be compared with EBVs for animals of other breeds. They should be compared with the current average EBV for the Limousin breed shown below:

AVERAGE EBVs for 2018 BORN LIMOUSIN CALVES

Accuracies -Accuracies are presented with each EBV and give an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analyzed for that animal and its relatives.

Mid Parent EBVs Where MP is shown for the accuracy of an EBV it is a mid parent value.

Disclaimer

The Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither the Australian Limousin Breeders' Society or ABRI oversee or audit the collection of this data.

Lot 1: MANGATARA 947P (PF) Polled
